

Teaching for Learning: focus interprofessional education

Aim

To prepare educators in health and social care for developing and leading interprofessional education

Intended Learning Outcomes

By the end of the course learners will be able to

- Appraise the drivers and benefits of interprofessional education
- Assess the generic and underpinning concepts of interprofessional education
- Analyse and explain the appropriate teaching approaches, models and strategies appropriate to interprofessional education, and practice skills to implement them
- Apply relevant theoretical perspectives for teaching and learning with interprofessional groups of students
- Analyse the skills required to manage diversity in interprofessional education
- Share good practice to demonstrate confidence to lead interprofessional education.
